

Club Race Registration Instructions

With our club races now having the online registration this is now an on the morning procedure simply to confirm which of the registered participants is going to compete.

This is simply achieved by the following:-

- Participant sheet will be already produced showing the names of all who have entered and their allocated chip number
- When the participant confirms they are racing on the morning simply highlight through their name on the sheet.
- If the member already has a timing chip then please ask if they have it with them. If they have forgotten their chip then this needs to be noted on the registration sheet next to their name – as FORGOT CHIP
- New members will have had a new chip allocated to them prior to the event. This new chip number will be highlighted in yellow on the registration sheet.
- This new chip is to be given to the new member and they are to then sign next to their name on the registration sheet confirming that have received this new chip.
- Race numbers on arms are no longer required (unless advised otherwise) at our club races where technical officials are not on the course.

Teams

- If teams have entered then it needs to be noted that only one chip is to be worn by the team.
- This chip will be passed between team members at the start of each leg in transition.
- The chip number which the team is using is to be noted on the registration sheet.

On behalf of the Darwin Triathlon Club committee thank you for offering your time and volunteering in the role.
